EDUCATIONAL HISTORY

Bachelor of Science in Information Technology (GWA 1.23)
University of Rizal System Binangonan
2019-2023

Information Communication Technology (GWA 95%)
Angono National High School SHS,
2017 - 2019

PROFILE

As a skilled software developer, I have experience as both an intern and freelancer. I specialize in designing and building applications using various technology stacks and have expertise in researching and utilizing new technologies such as OpenAI services. I am also adept at designing databases and user interfaces using Figma and offer tutoring services to help students improve their programming skills.

WORK EXPERIENCE

Software Developer Intern
Calcmenu Philippines Inc.
January 2023 - April 2023

- Conduct research and develop software applications based on the specifications provided by the head software developer.
- Research and explore various OpenAI services, such as fine-tuning, embedding, chatgpt, moderation, and text-completion, to gain an in-depth understanding of their potential use cases.
- Report research findings to the CTO and supervisor.
- Develop a chatbot that provides accurate responses by utilizing OpenAI embedding technology.
- Design and develop utility applications, such as a recipe parser or a chatgpt question and answer saver, for use by the existing system.

Freelancer Full Stack Developer
Self Employed
June 2021 - January 2023

- Provide guidance and support to clients, primarily students, throughout the entire project development process.
- Offer tutoring services to students to help them improve their programming skills.
- Design and plan relational or NoSQL databases tailored to meet the client's project requirements.
- Utilize Figma to create detailed designs, plans, and prototypes for the system's user interface.
- Build applications from scratch, utilizing a variety of technology stacks, to meet the client's program specifications and ensure high-quality results.
